## TEN PAGES

There is one comforting thing about the frequent soaking rains—candidates for county offices in their numerousness can't kick up any dust in the rural districts.

Should Col. Roosevelt be the republican nominee for president it is reasonably certain that Col. Bryan will be the democratic candidate. Then it will be a fight to the political death of one or the other of them.

Former Congressman Kennedy evidently decided not to listen to the pleadings of his friends to enter the race for the republican nomination for congress in this district. At any rate he filed no petitions showing a desire to have his name appear on ballots to be voted May 21.

The constitutional convention in session at Columbus on Wednesday adopted a resolution to adjourn June 17. The work is to cease May 3 and the convention shall adjourn until May 13. From that date until June 17 the convention is to consider the reports of committees on arrangements and phraseology.

After all, there are only three candidates for the republican nomination for congress in this district, one from each county. The gentlemen who filed petitions are R. J. Jones of Columbiana and Roscoe McCulloch of Stark. Several other men have been talked of for the nomination, but when the show down came they were conspicuous for their absence. It now remains to be seen how well the electors of the three counties will stand by their favorite sons.

The meeting of mother and children was a pathetic one. Rosie will be remembered by Canfield people as the bright little girl who has been entertained there on different occasions by the Noll family.

There is a lively fight being made for places on the board of elections. The terms of P. J. Hogan, republican, and Ezra Welsh, democrat, both of whom have had two terms, expire. Fatality Food for Thought.

Colossal calamity, especially sea or ship sinking, is a thing to make one curiously and seriously speculate, possibly prompting him to fancy results or conditions if Noah's ark has sunk and none escaped and what would have been the sequel if the small and frail fleet of Columbus had been crushed by ice, sent to the bottom or scattered and shattered by winds and waves, as was much of the invincible Armada sent by Spain to wipe England off the face of the earth. The confidence in that fleet, sailing in the form of a vast crescent, was as great as that of the builders and owners of the Titanic in that sunk unsinkable ship. The loss of the ark would have been, if not followed by another Eden episode, or wonder somewhat similar, utter extinction—

all life on earth annihilated. If Columbus had been doomed to such disaster the loss would not have been irreparable, for it is certain he would have been followed, as he was probably preceded, by other western-world discoverers.—Vindicator Ohio.
